SUMMARY

Co-founder of Construct Computer, a workforce of AI employees that each get their own cloud computer, which launched as **#1 Product of the Day on Product Hunt**. Full-stack engineer shipping AI agents, MCP servers, Cloudflare backends and Solana programs since 2022. Previously built BetterIDEa, a developer tool acquired by Forward Research.

EXPERIENCE

Construct Computer | *Co-founder* Feb 2026 - Present

- Built the agent platform: a runtime on Cloudflare Workers and Durable Objects, a React desktop to watch agents work live, MCP apps, long-term memory and sandboxed tools.
- Moved the backend off a container-per-user VPS onto Workers, Durable Objects, Containers, R2 and D1 in ~10 days.
- Shipped the Jev decision model into agent memory 5 days after release (1 call instead of up to 3 LLM-judge calls) and first-authored a 1,053-call model-swap study.
- Launched NepoNet, a warm-intro finder for X with a remote MCP server and OAuth (#9 Product of the Day).

Forward Research | *Entrepreneur in Residence* Nov 2024 - Oct 2025

- Rewrote BetterIDEa for HyperBEAM and made the AO Package Manager load by default in every aos process.
- Built WAuth, a social-login SDK with invisible wallets (~5,300 npm downloads), later adopted by ArLink Labs.

Arweave India | *Developer Relations Engineer* Jun 2024 - Apr 2025

- Organised Arweave Day India 2025 and hackerhouses, mentored 100+ developers and judged 40+ hackathon builds.

BetterIDEa | *Founder* Dec 2023 - Oct 2024

- Built a web IDE for Arweave and AO that won a hackerhouse Grand Prize and was acquired by Forward Research.

Physics Wallah | *Software Engineer Intern* Nov 2022 - May 2023

- Built a live-class tool parsing real-time YouTube chat (10K+ messages) for classes with 50K+ concurrent viewers.

PROJECTS

TradeX | *Rust, Solana, MCP* Feb 2026 - Mar 2026

- Pokemon card perpetual futures with up to 20x leverage; passed an independent audit with all 12 findings fixed.

MyPokemonScanner | *ONNX Runtime Web, WebGPU, React* Jan 2026

- Offline in-browser scanner matching photos to 40K cards with a custom YOLO11n detector and MobileCLIP-S2.

SKILLS

Languages: TypeScript, JavaScript, Rust, Python, Lua, SQL
AI & Agents: AI agents, Model Context Protocol (MCP), Tool calling, Agent memory, Retrieval, Evals, Structured outputs
Backend & Cloud: Node.js, Hono, GraphQL, WebSockets, Cloudflare Workers, Durable Objects, D1, R2, Docker, AWS
Frontend & Web3: React, Next.js, Tailwind CSS, Electron, Solana, Anchor, Arweave, AO

AWARDS

- **#1 Product of the Day** on Product Hunt (Aug 2026); TinyFish Accelerator Build Sprint (Mar 2026).
- **13 hackathon and competition wins**, including 1st at C-DAC Vegathon and prizes at ETHIndia and ETHOnline.

EDUCATION

Chandigarh University | Bachelor of Engineering in Computer Science
